in stainless steel tanks for 15 days

ALCOHOL:

13,25%

TOTAL ACIDITY:

6,05 gr/l

PH:

3,26

GRAPE VARIETY AND VINEYARDS

The vineyard, situated in the municipality of Castiglione in Teverina at an altitude of 200 meters above sea level, is led using the spurred cordon system and is carefully managed during the various phenological phases. This ensures that the grapes reach optimal ripeness.

VINIFICATION

The Chardonnay grapes are harvested during the first week of September. Grapes are cold macerated and fermented at very low temperature to fully express its unique aromatic characteristics. The wine is then kept on its lees until it is ready for bottling.

THE WINE

The subtle greenish reflections suggest the wine's vibrant, fresh character. On the nose, citrus notes emerge first, followed by hints of yellow flowers. On the palate, it delivers lively acidity and a bright, refreshing character. An enjoyable and versatile wine, perfect as an aperitif or paired with a meal.
